To the AUTHOR of the GRAND MAGAZINE.

SIR,

IF you have not already heard of the following extraordinary Instance of the Powers of Vegetation, or the Transmutation of one Species of Corn into another, I am perfuaded I need make no Apology for troubling you, on so important and curious a Subject.

This Phænomenon was first observed in Sweden, where it was discovered by mere Accident. A Countryman having sown some Oats in his Field, and wanting Provision for his Horses, mowed the young Shoots of the Grain, soon after they were come up; the Grain shot forth again, as usual, and the Farmer mowed it as before. He did this at Intervals, three Times: The Winter coming on, no more Rising appeared till the following Spring; when, shooting up as before, they were permitted to grow to Perfection; and the Crop, to the Surprise of the poor Husbandman, instead of proving *Oats*, turned out absolutely good *Rye*. This Fact coming to the Ear of a very ingenious Naturalist of that Country, Mr. *Jon. Bera Vergen*, he suspected there might be some Deception; and accordingly, in the Year 1756, repeated the Experiment; observing exactly the same Measures, by Design, as the Countryman had taken by Chance. The Result of his Experiment, was the same; and his Oats produced good Rye, as that of the Peasant had done before. A circumstantial Relation of this Extraordinary Discovery was soon afterwards sent to their High Mightinesses, the States-General, by Mr. de Marteville, at the Court of Sweden. Curiosity, and the Desire of further Knowledge concerning this surprizing Phænomenon, induced some of the Naturalists of this Country, to try the Experiment again. Among the rest, was Mr. *Sypenstein*, one of the Magistrates of Harlem, and the President of the Society, lately established there for the Improvement of Arts and Sciences. This Gentleman sowed a Handful of Oats, on the 25th of June, 1757, and again another on the 26th of July following. The first he cropt at three several Times, viz. on the 19th July, the 8th of September, and the 23th of November. The last he cut only twice, viz. on the 23th of September and 28th of November. The succeeding Winter happening to prove very severe, almost all the Grains perished in the Earth, thro' the Inclemency of the Weather; five of them, however, remained alive, shot up in the Spring, and produced large and full Ears of Rye; which was reaped the Seventh of last August.

As the utmost Care was taken in this Experiment to avoid any Mixture in the Grain, as well as to prevent any Grains of Rye from falling Accidentally, or otherwise, on the Spot of Ground sown, this Transmutation, however strange it may appear to the Ignorant, or inconsistent with the Systems of Naturalists, is looked upon here as an indubitable Fact.

With a View of prosecuting this Discovery still further, Mr. *Sypenstein* has sown a fresh Parcel of Oats, treating them as before. He has also sowed some of the Rye produced from the Oats; which he has crept in the same Manner as he did the Oats that produced it. He proposes also to make several Experiments, with a little Variation, in order to improve on this Discovery. I shall take the Liberty to communicate to you the Result of these Experiments, and a circumstantial Detail of the Cautions and Success of each, as soon as they——known to

Your humble Servant, A. Q. *Mr.*

BOSTON, *July* 23.

The following is a more particular Account of the surprizing Hurricane, which happened at Lexington on Tuesday the 16th of January, drawn up by a Gentleman in a neighbouring Town, from his own Observations, and by Accounts from some who were upon the Spot.

IT is supposed to have begun in Spencer, about a Mile and a half, or not exceeding two Miles near S. W. from Mr. *David Lynde's*, at the last House in Leicester, next to Spencer.——The main Force of the Wind seems to have been confined to about the Breadth of 40 Rods; but little Effects of it's Violence to be discovered without that Extent, during it's whole Course, which continued with the utmost Violence from S. W. to N. E. near about 6 Miles, from the last Accounts yet come to Hand. The greatest Damage known to be done by it, was at *David Lynde's* House, which stood open to the S. W. directly in the Wind's Course.——Immediately upon the Wind's striking the House with all it's Force, and before the People (six in Number) had Time to shut the Doors; but endeavouring to do it, it was in an Instant taken up, and carried off, leaving nothing behind but the Sills and Part of the lower Floor, and the People in it mostly buried away.——Two Children were found lying on that Part of the lower Floor that was left behind, and in the Cellar-Way: Those that were carried off with the Building were scattered and dispersed at different Distances round where the House stood. A young Girl was found at the Distance of 30 or 40 Rods in the Woods, with her Cloaths, Shoes, Stockings, and some green Pasture at 6 or 8 Rods Distance.——The strongest Timbers of the House were splintered, split to Pieces at the Sills, and some Parts of the House, and some of the Cloathing, were carried 5 Miles Distance, and some Papers taken up at 8 Miles.——For near half a Mile from where the House stood in the Course of the Wind, the Ground is strew'd with the Silver's Pieces of the House; and Multitudes are sticking in the Ground, till you come to a Pond that is covered with the Ruins of the House and Furniture (a few small Articles only of the latter, have as yet been found) full half a Mile distant from the Place it stood on.——So far as I followed the Ruins I could not find one Piece of Timber whole, or one Board but what was split to Pieces of the whole Building; besides 3000 of new Boards taken out of the Yard, all which were shove into Shivers unfit for any Use.——The Pewter, Iron-Pots and Kettles, cannot be found at all, except one Plate, one Dish and one Iron Pot.——Some of the Beds that were found, were hanging on high Trees at a Distance.——Malt that were in a Cask in the House, were drove with such Force into distant Trees, as not easily to be drawn by the Strength of a Man's Fingers.——Large Trees taken up by the Roots Thousands of them.——Apple-Trees in the Orchard adjoining taken up and brought nigh to the Place where the House stood.——A heavy Log more than a Foot Diameter, in which hung a large Grindstone, taken and carried over the Wall into the Garden.——One of the Spars of the House carried into a Neighbour's House about 50 Rods, and struck off the Cap of his Door, and beat a Hole into the House. The Timbers of the House were carried with such Force into the Air, that when they fell some were found sticking 2 Feet or 3 and a half in the Ground. Not only the House, but the Barn and all Out-Houses are entirely demolished: And tho' the Manner of their Demolition is singular and very extraordinary, yet it is very remarkable, that out of 12 Persons flying among the Wrecks of all those Buildings, but one should be yet dead; a Negro, taken up after it was all over, his Thighs, Back and Arms broken, and who presently expired in extreme Misery: 'Tis thought he was in the Chamber when the Gale took the House, and was hurled in almost contrary Direction from the Course of the Wind, near 8 Rods.—The Man of the House dangerously hurt.——A Child was taken out of the Ruins alive; and 'tis remarkable, that the Stones and Rubbish with which it was surrounded and covered, were situated in such a Manner as tho' done by Art.——Divers of the Persons in the House escaped with little or no Hurt, tho' it is hardly possible to conceive how they should escape an immediate Destruction, such was the sudden and amazing Ruin of the House where they were.——Two Horses were killed; one standing at the Door, another in the Pasture at some Distance from the House.——Old Logs of 2 or 3 Feet Diameter, lying in moist Land and considerably sunk in the Ground, were rolled out of their Beds, and carried Rods before the Wind; so large and heavy that 6 or 8 Men could hardly have rolled them over with Leavers.——There was a most amazing Noise attending this Tempest, which lasted not more than 2 or 3 Minutes in all.——The Neighbours say, the Earth seemed to tremble, and such an unusual Motion in the Clouds and Heavens, as tho' they were falling on the Earth; attended with Rain and an Egyptian Darkness.——Limbs of Trees, Mud, Dirt and Pieces of Fences, were flying in the Air, and clashing together; which those at a little Distance and out of the Wind could perfectly observe.——There is no other Building that fell so directly in the Center of the Force of this Gale, that has been heard of; so that 'tis possible it began to abate soon after it passed this House.——It is evident from the twisting of the Trees and the shattered Pieces of the Building which lay all around every Way, that it was a Whirlwind, or that it run in a Sort of Eddy, tho' keeping nigh a strait Course.——A full Account cannot yet be given, as Nobody has followed it thro' it's whole Course.

Extract of a Letter to his Excellency, from Lieutenant-Colonel Hear, Commanding Officer at Annapolis-Royal, dated 9th of July, 1759.

"The 30th of June in the Night, a Party of French and Indians, as has been the Practice for several Years past, came and drove off Twelve Bullocks, belonging to this Place; I had Intelligence of it about 10 o'Clock in the Morning, and immediately sent 60 Men in Pursuit of them, who came up with them about 20 Miles Distance, encamped a few Rounds, then marched off; sweat our Men being much fatigued, and not the least Refreshment with them, returned home, not Men enough to attack, not dangerous. Upon that Party's Return, another Party laid themselves in Ambuscade, and marched off at 10 o'Clock in the Evening, being very strong. I continued them under Arms, which they did not, expecting another Fish would be here. Our Party came up with them about 2 o'Clock the same Day, and as soon Thirty of their Firelocks were on the Ground, the Number of those being out, fired what they could, and then rushed immediately on with their Tomahawks clothed, and the Enemy, the Body of the Fellows, leaving all their Bullocks, Packs, Provisions, Blankets, Cloaths, &c. all which the Party brought in; and by several Bandages and Rags which the Party found every Day, together with a Hat they found just then dropped, some of the Enemy, from their Countenances, I guess, must be killed or wounded. The Inhabitants were so well pleased with the Success of the Troops, as to clear out and bring in their Cattle, that they have ordered me Reinforcement to stay here."

Yesterday Morning Capt. *Gilbert*, in the Sloop *Success*, arrived here from the Bay of Fundy, and informs, That the Tuesday 3d inst. having left his own Vessel, he with 28 Men, and a French Pilot, in a small Boat, set out for another that was lately found a Prize in the Bay, and proceeded up one of the Rivers in that Bay, in order to intercept Vessels that might come out. After they had rowed about 9 Miles, they discovered a Sloop at Anchor, which they boarded, and found her to be a Prize of about 100 Tons, which had been taken by a Number of French and Indians on our Side, and a large Periauger on the other, and mutinied [illegible] the Prize Vessel and Periauger, and carried them up the River. Capt. *Gilbert* then had 9 Rounds, but luckily none of his People were killed, tho' several of them were shot through their Cloaths, and Hardly escaped in one of his Hands, and his Dog, that stood close by him, the Enemy were so near, that their Pieces had been charged the Second time before they could get off. Capt. *Gilbert* imagines he must have killed several of the Enemy, as he and his People fired all Rounds at them; but they being so far superior in Number, consisting of at least 60, he was glad to make the best of his Way off.

Marlborough, July 10th, 1759.

The Measles have been very rife in this and the neighbouring Towns, wherein Numbers have died, excepting in this Town, where upwards of Five Hundred have had them, from the Age of Seventy-odd to the Age of Six Weeks, and not one Person died; and are all now in good Health.

General AMHERST having requested of the Province of New-York, a Loan of 150,000 l. that Currency, redeemable in twelve Months after their Date, by the Monies arising from Bills of Exchange drawn by Mr. Monkton, Deputy Paymaster General; the Assembly, in Conformity thereto, passed an Act for emitting Bills of Credit to the Amount of that Sum, in order to enable him to pursue his Operations, and facilitate the Success of his Majesty's Arms.

The following Advertisement appears in one of the late London Papers, which, the printed a Thousand Leagues Distance from this Place, it no Doubt spoils the Mind of many of the young Ladies in New-England now.

"A MAIDEN LADY, of about 32 Years of "Age, is inclinable to alter her Condition; and tho' "she flatters herself that she is far from being disagreeable "in Person, yet she never had one tolerable Proposal made "to her on the Score of Matrimony. She therefore takes "this public Method of declaring, she is weary of a single "Life, and desirous of an agreeable Companion: Her Fortune is no more than 5000 l. and consequently she is not "vain enough to expect any Proposals from a Gentleman of "good Fortune; A good honest Tradesman, well settled in "Business, is the utmost her Ambition soars to: He must "be neither clownish nor foppish, his Age shall not exceed "30, and he must be affable and good natured. Any Gentleman that is willing to be a Candidate for this Lady's "Affections, is requested to leave a Letter directed to H. "A. at the Ball, opposite Surgeons-Hall, mentioning his "Business, Age, and other Particulars: His Name or Place "of Residence will not be expected till an Interview. Any "Letter which the Lady may receive, seeming to promise "Satisfaction, will be duly answered, and an Interview "granted on Condition that the Gentleman will promise "Secrecy upon Oath."

NEW-YORK, *July* 30.

Camp at Lake Ontario, July 7, 1759.

"It is with the utmost Satisfaction that I can inform you of the Success we have had in repelling the different Attacks of the French against our Entrenchments, and of their Embarkation on the 6th Instant. The Fourth at Night, between Eleven and Twelve, the French Forces, consisting of a Detachment of the Regiment of Marine, from Canada, and 150 Indians, amounting in the Whole to 1040 private Men, under the Command of Chevalier de la Corne, landed in 2 Coves about two Miles from our Encampment, behind a Point of Land that covered them entirely from our Sight. We were entirely ignorant of it all except Seven that next Morning, when a dreadful Shout of Indians was heard in the Woods at a Distance from a Detachment of our Pickets, then out to cover some Men cutting Faicines to complete our Breast-Work; but they came in without the Loss of a Man, as the Scheme of the Enemy was very likely to draw a large Party out of the Camp, in which they were disappointed. A Battoe was sent out to reconnoitre, and perceived those of the Enemy, amounting to about 100, and an Encampment on the Shore; upon that Report, every Man was ordered to Work, in order to put our Entrenchments, not then finished, in the best Posture of Defence. Three Thousand, or very near that Number of Barrels of Provisions, were then hauling out, under no Protection but that of a small Post; as many Men as could be employed usefully, were kept at rolling on the Breast-works the Breast-Work; no Time was lost, every Officer and Man contributed with Zeal and Alacrity to time by Four o'Clock the greatest Part was so, and we were quite covered and cover. The Inactivity of the Enemy, during all that Time, made us think that they were employed in carrying their Provisions. About Four they began a very severe Fire of Musquetry from behind the Logs and Trees. No Body was allowed to answer their Fire for some Time, expecting that we had them more nearer. The three Floats of Artillery we had, were chiefly employed in firing where every Body thought a Man could be seen together. Some small Reinforcements, the 1st since Trent, did some Execution, as was a Detachment of the 2nd Batt. in which we had one Officer and 40 Men killed and many hurt, and wounded. The Fighting

of the Enemy lasted till about Seven o'Clock, when they thought proper to retire; their Shot were well adjusted; and had it not been for some Logs that we had put to cover our Heads, and fire underneath, we should have lost a great many Men.

"Engineer Sowers was badly wounded in encouraging some Men employed in the Breast-Work, in a small Trench, in the beginning of the Action. We had one Man killed at the Post on the Left, and three wounded in the Entrenchment.

"By Eight at Night I marched with the Picquet to cover the Men ordered to bring in the Rest of the Provisions. A Deserter from the Enemy came in, and from him we first learned their Number, and what was still more agreeable, that they had no Artillery. At 12 o'Clock I came in again, without having discovered any Body; we were all Night under Arms, and next Morning, to our great Surprize, we were not attacked, which made us think they had found us too strong for them, and that they were gone off. By Seven, tho' we began to perceive they were coming again, and that they were surrounding us, we had a small Post to cover the Battoes on our Right: The Indians surrounded it almost, except that Part towards the Breast-Work, and fired very smartly upon it at the same Time they fired upon our Left, where we had two Pieces of Cannon; they seemed to have fixed their Aim at that Place; it was low, and the Road to come to it clear for them; however our Musquetry and Grape-Shot kept them off: They contented themselves with firing very briskly upon us, and the Post on the Left, but durst not attempt to come near; their Intention, as well as the Day before, was to have attacked us, thinking we were not above 500 strong.

"Colonel Haldiman, during all the Attacks, was very active; the Enemy, finding all their Schemes abortive, attempted to burn our Battoes, and let them adrift, in which they might have succeeded, but a Party of our Regiment sallying out of the Entrenchment at that Time, beat them off, and saved 7 or 8 Battoes, that they had cut the Painters of, and set on Fire, but they were soon made fast, and the Fire extinguished. The French Indians seeing our brave Defence, and the Cowardice of the Canadians, who could never be prevailed on to rush upon us, took to their Battoes, but were prevailed upon to come back again; at last, about Half an Hour after Nine in the Morning, they retreated for good, and every one of them went to the Landing-place, where they reimbarked with all the Haste possible, and sheered off.

"It must be told, to the Honour of our Men, that they behaved uncommonly well, and never fired but when they saw an Enemy, and took very good Aim; the Loss of the Enemy, altho' they were so scattered, must not be inconsiderable; we found but three of their Dead Yesterday; but great Tracks of Blood were seen; and the Place where the Musquetry could do Execution, as well as the Landing-place, have not as yet been searched, as Colonel Haldiman did not think it prudent to venture so far as that, the Party he sent out for that Purpose, but only sent them all around within Cannon Shot; and the Ground round within Musket Shot is not reconnoitred.

"Mr. Otter, of our Regiment, who commanded the Post on the Left, behaved very well, was wounded in the Head. In the whole, we had Mr. Sowers, Engineer, wounded; and Mr. Otter, and ten Privates of our Regiment, more wounded; 3 of the New-York Regiment, and 2 Carpenter, also wounded, but slightly; and 3 of our Battalion killed.

P. S. Two Deserters that came in say, the Commander of La Gallette had one of his Legs shot off, one Officer killed, and several wounded; that they had about twenty Men wounded that they knew of; but that they were so occupied about the Means to desert, that they had not been able to get any other Intelligence; that the Enemy is still behind a great Point that conceals them from us, and in great Want of Provisions, the Bread they have being all mouldy. Ours would please them highly I dare say."

Tuesday last was sent in here by the Privateer Sloop Harlequin, Capt. Sloe, a French Sloop, called the Saint Lager, M. Monviel Master, loaded with Sugar, Coffee and Cocoa, which he took the 22d of June, bound from the Grenades to Coracoa. The above Sloop sailed with another of 6 Guns, bound for Corsica also, but he got clear by outsailing the Harlequin, who was left in Chace of 2 Polaces from the Cape, bound to Old-France, when the above Sloop parted from her.

Thursday last returned here from a Cruize the Privateer Ship Sturdy Beggar, Robert Troup Commander, without having met with any other Success than what has been already mentioned. The 9th Instant, off Monte-Christo, Capt. Troup fell in with M. Bompar's Squadron, consisting of seven Sail of the Line, and two or three Frigates, two of which, viz. a 74 Gun Ship, and a Frigate, gave Capt. Troup Chace, but, having the Heels of them, he got clear. During the Chace the Beggar sprung a Leak, which obliged Captain Troup to break up his Cruize.

The following Letter was wrote by an Officer, in his Way from Niagara to Oswego, the 26th of July, 1759.

"Before this Time, I expected to have congratulated you on the Reduction of Niagara, but the Garrison and Fort are much stronger than we expected. Without the Enemy having the least Notice of our Approach, we landed the 6th, within 3 Miles of the Fort. The Indians and Light Infantry immediately marched forward, and took 82 Prisoners, but had one Mohawk killed. By the Prisoners we learnt, that the Garrison consisted of 600 Men, and 400 that have got in since, make 800. A Schooner, and 4 Sloop, were in the Harbour; the former mounts 10 Carriage Guns, and has kept an incessant Fire on our Battoes, but as they are in a good Harbour, as yet the Enemy has done them little or no Damage. Our Trenches are carried within 250 Yards of the Fort, where we expect our Batteries were opened at Yesterday, to mount two 18 Pounders, two Brass Twelves, 4 Eights, and 4 Royal Howits of 8 Inches. For three Days past we have played upon them with 3 Pieces of Cannon, and have fix several of their Buildings on Fire. We expect to be Masters of the Fort in a Week, unless it is reinforced.

"Niagara, from our Trenches, appears to be very strong, but is not yet completed. In the Fort are several very good Buildings. The Governor's House is built of Stone, at least 44 Feet Front, 3 Story high, has Sash Windows, and is 40 years to be compleatly finished. The Enemy have already fired near 6000 Cannon Balls, besides Thousands of Small Arms, but as yet have only killed 4 Men, and wounded about 20; among the latter Capt. Williams, our Head Engineer, dangerously, and Lieutenants Allyn and Pennistone, slightly.

"We now have 500 Indians with us, and more daily coming in."

Yesterday Afternoon, the Post came in from Albany, by whom we have the following interesting and agreeable Intelligence, viz. That on Saturday Morning the 21st Instant, at 5 o'Clock, his Excellency General Amherst, with the whole Army under his Command, embarked on board the Batteaus and Whale-Boats in the Lake, and sailed in three Battoes and Whale-Boats in the Lake, and sailed in three Divisions: That he landed the 22d, without the least Opposition, at the Narrows (the same Place where General Abercrombie did last Year) five Miles from the Fort of Ticonderoga, and three from the Saw-Mill; from whence he sent Major Rogers for ward with a Number of Rangers and Light Infantry, who marched as far as the Mill, without seeing any of the Enemy; but a little beyond he met with a Party of 200 French and Indians, which he attacked, killed some, and took 40 Prisoners (among whom were two Indians) and obliged the rest to fly to the Fort. On Major Rogers's Return to the General, the main Body marched forward on Monday Morning, and took Possession of the Enemy's Lines, which they had abandoned the Night before. The General was to open a Battery against the Fort on Wednesday Morning, and did not doubt but he should be in Possession of it in a short Time; tho' they kept an incessant Fire from their Cannon and Mortars, on our Troops in the Trenches. The French Garrison is said to be above 3000 strong. Major Rogers, in his Skirmish, had six Men killed, two of which were scalped.

Extract of a Letter from Lake-George, dated July 26.

"Our General took Possession of the Lines at Ticonderoga the 23d Instant, the Enemy having abandoned them in the Night. Some wounded Men are come to the Lake. Ensign Hamilton, of General Forbes's Regiment, is killed. And the Fort at Lake-George, under the Inspection of the indefatigable Colonel Mercereau, is very forward."

We are informed by a Letter from the Society for Propagation of the Gospel, That that venerable Body do strongly patronise our infant College, and have given it 500 *l.* Sterling; and recommended it to all their Members to procure Benefactions for it.

PHILADELPHIA, *August* 2.

Yesterday we received, by a private Express, the following short and general Account, viz.

New-York, July 31, 1759.

"TICONDEROGA is taken——Colonel Townsend "was shot by a Cannon Ball in his Tent——General Prideaux (before Niagara) was killed by the Bursting of one "of our Cohorns——Colonel Johnston, of the New-York "Forces, is also killed——Niagara expected to be taken the "next Day——Our Works within 80 Yards of that Fort "——Colonel Haldimin is fent for from Oswego to Niagara, "to take the Command——Colonel Amherst is in Town, "and sails this Day for England——The Prisoners say "Quebec was invested."

Extract of a Letter from Pittsburgh, July 15, 1759.

"The 13th Instant, at Six o'Clock in the Evening, arrived here two Spies we had sent out to Venango, to know the Truth of the Intelligence we had received from several Indians, of the French being to their March from Presque Isle to Venango with a large Body of Troops, composed of French and Indians, to attack this Place, and that they had with them a Train of Artillery. They informed us, that on their Arrival at Venango, they found there about 700 French, and 400 Indians: That on the Night of the 28th Ultimo came in about 200 Indians; the next Day about the same Number; and on the Day following about 250 more; when the Commandant told them, he would speak to them the next Day. On the last of the Indians arriving, the French Officers were employed in cleaning and fitting them out for the Expedition; and by the Eleventh or Night, the Whole were disatched. At Ten o'Clock the next Morning, they all met in Council, when the Commander gave the Indians Presents for joining him, and desired them to prepare themselves, for he intended to set off the next Day to attack this Fort, and then throw down the War Belt.

"There were two Six Nation Indians in the Council, who had come the Night before, one of which got up, and made a Speech to all the Indians, telling them, That their Father was in too great a Hurry; desired them to consider some Time what they were going to do; and delivered them a large Bunch of String Wampum.

"This threw the Indians into some Confusion, and before they got out of it, two Indians arrived with a Packet of Letters for the French Commandant; which he opened and read, and, after some Discourse with his Officers, addressed himself to the Indians, and said, Children, I have bad News to tell you. A great English Army, with Sir William Johnson, who has with him the Six Nations, and a great Number of other Indians, that Way, are on their March to attack Niagara: That he had Orders to go directly there, and to take them with him: That he should lay aside all Thoughts of going down the River, until he had driven the English from Niagara: That it was a Place of great Consequence to them and their Children; and, if the English took it, they must certainly be poor; as the Road to their Country would be stopped up; therefore desired them to be strong, and support their Father well at that Time. He then gave Orders for the Batteaus to go up the River, and to have those that were nearest down.

"The Spies say, they saw only three Cannon, but that the Breath expected in the Batteaus, that were to have been there that Night, were many; and that about thirty of the Batteaus set off while they staid, and a great many Indians were trying up their Blankets, in order to ascend up the River. They are of Opinion that the French will endeavour to divide them, and have some behind to attack the Road: That 40 western Wyandotts, the Whole that were with the Enemy, had gone home: That on the 13th in the Morning, some of the Party that attacked Logstown returned, but brought neither Prisoners nor Scalps; and said, they had one Indian killed, and two wounded: That soon after four Indians more came in, and informed the French Commandant, that the English Army were come over the Great Mountain (Alleghany) with a great Number of Horses loaded, and Cattle, and that there would not be less than 4000 Men.

"The Spies further advise, that they had engaged three Shawanese, who left the Enemy, to stay and see whether they would stop, and that for one for this Place with the Intelligence. We are sending off fresh Spies to watch their Motions.

Two Twightwee Wyandotts guarded here this Day from near the Lakes, who say, that the Chief Men of their Nation, with 70 others, are on their Way here.

We hear further from Pittsburgh, that at the Time the above Intelligence was brought, there were Deputies from several Indian Nations, with Presents from the Governor of Canada, his Majesty; and that on their Arrival at Fort du Quesne, Mr. Croghan, Sir William Johnson's Deputy, and Colonel Mercer, the Commander of the Fort, opened the Conference; when a firm Peace was concluded, to the great Joy of those Indians, who promised to spread the News thereof both far and wide.

They took with them ſeveral Things, ſo that it is impoſſible to deſcribe their Dreſs.

They were imported in the Ship *St. George*, now lying in the *North-Weſt Branch* of *Patapſco*.

Whoever brings the ſaid Runaways to me, or ſecures them ſo that they may be had again, ſhall receive for each, if taken within the County, One Piſtole; if out of it, Two; and if out of the Province, Three Piſtoles, paid by BENJAMIN YOUNG.

RAN away from the Subſcriber, a Conviſt Servant Man named *Richard Fiſh*, on Saturday the 21ſt Day of *July* laſt; he is a bold well looking Fellow, about 5 Feet 6 Inches high. He had on and took with him, a Suit of Sailor's Cloaths, blue Jacket and Trowſers, and a large blue Great Coat, lined with red. He ſtole and has with him a Pair of Piſtols. He went away in Company with a Sailor that lately run away from the *Lyon* Man of War, Captain *Stirling*, now in *Pennſylvania*. Part of his Dreſs is a remarkable large Pair of Trowſers, and has an Impediment in his Speech.

Whoever takes up the ſaid Servant, and ſecures him in any Goal, or delivers him to the Subſcriber at the Lower Ferry on *Saſſafras-river*, ſhall receive Two Piſtoles Reward.

JOHN CLARKE.

RAN

August 6, 1759.

RAN away Yesterday, from the Subscribers, living near Squire *Cornell*'s Manor, on *Elk-Ridge*, a Convict Servant Man named *Mark Dyder*, born in *England*, is a tall slim Man, about 6 Feet high, has short brown Hair, a round Face, is a well looking Fellow, speaks good *English*, bends in his Knees, aged 30 Years. Had on a Cotton Jacket, Osnabrigs Trowsers and Shirt, Country Shoes, and Felt Hat. It is probable he may have changed his Cloaths, as his Wife, who run away with him from *Lawrence Robyns*, took a Suit of light colour'd Broad-Cloth with Metal Buttons, and a Suit of Linen Cloaths (the Coat lined) and some Cash. She is a thick set short Woman, has dark Hair, is marked with the Small-Pox, and has a Cast with her Eye. Had on a striped Flannel Jacket, a Crocus Petticoat, and old Shoes. It is supposed she is dressed in Man's Apparel, as they have taken the above Cloaths.

Whoever secures the said Servant Man, so that he may be had again, shall have, if taken 20 Miles from home, Twenty Shillings; if out of the County, Forty Shillings; and if out of the Province, Three Pounds; and for the Woman, Twenty Shillings, and reasonable Charges if brought home.

J. Ireland, J. IRELAND,
LAWRENCE ROBINSON.

It is thought a Servant Man of Mr. *John Washington*'s is in Company with them.

THERE is at the Plantation of *Patrick Glass*, in *Frederick* County, taken up as a Stray, a middle-siz'd Grey Mare, she is branded on the near Buttock E C.

The Owner may have her again, on proving his Property, and paying Charges.

THERE is at the Plantation of *John Jacobs*, at the Mouth of *Monocksy*, in *Frederick* County, taken up as a Stray, a Grey Mare, about 14¼ Hands high, branded on the near Shoulder C, and had on an old Bell.

The Owner may have her again, on proving his Property, and paying Charges.

THE Subscriber having been a long Time confined in *Anne-Arundel* County Goal, and not having wherewith to satisfy his Creditors, hereby gives Notice, That he intends to apply to the next General Assembly for an Act for his Relief. *J. Mapless*. JOHN MAPLES.

RAN away from the *Elk-Ridge* Furnace, on Friday the 13th of *July*, a Negro Man named *Tom*, he is about 30 Years of Age, 5 Feet 9 or 10 Inches high, has a remarkable large Scar proceeding from each of his Temples down his Cheeks, a well made Fellow, looks a little sullen, and talks pretty good *English*, and a little *French*. He carried with him an old dark colour'd *Monmouth* Cap (and is supposed soon after to have stole a pretty good Hat and a white Cap, they being missing much about that Time), a good Osnabrigs Shirt, Cotton Jacket and Breeches, Hempen Roll Trowsers, and old Shoes. He was formerly accustomed to go by Water, and probably may attempt to escape that Way. He formerly belonged to Mr. *Thomas Ringgold*, in *New-Town* upon *Chester* River, to Capt. *Michael Earle*, near *Frederick-Town* upon *Sassafras* River, but last of all to Mr. *Henry Pearce*, at *Herring-Run* in *Cecil* County.

Whoever takes up the said Runaway, and brings him to the Subscriber, at the *Elk-Ridge* Furnace, shall have Twenty Shillings Reward, besides what the Law allows. CALEB DORSEY.

JUST PUBLISHED,

In large Octavo, Price, neatly Bound, 125 6 Currency.

By JAMES REEDER, *Attorney at Law.*

AN Abridgment and Collection of the Laws and Acts of Aſſembly of the Province of MARYLAND at preſent in Force, with a ſmall choice Collection of Precedents in Law and Conveyancing, calculated for the Uſe of the Gentlemen of the Province of *Maryland*.

As Abridging might alter the Meaning of the Enacting Clauſe, the firſt propoſed Method is laid aſide, and every Act containing any material Law is inſerted and given in Full, in the very Words of, and carefully copied from, the original Act; nothing being Abridged but the Preamble, general Form of the Enacting Part of the Act, and the Form in every Penal Act of applying and recovering Fines.

There is a very full Index, a Table of the Acts inſerted, and a Table of the expired and repealed Acts, and every Clauſe in any Act at preſent in Force, that has, by any ſubſequent Law, been repealed; mentioning when they expired, and the Acts whereby they ſtand repealed; ſo that upon comparing the Tables, any Perſon will directly ſee, that no material Law is omitted, nor any expired or repealed Act inſerted.

The Precedents are alphabetically digeſted, great Variety given, ſuch choſen as are freeſt from Tautology, with a Number peculiarly adapted for *Maryland*; ſuch as, Acknowledgments of Deeds, Probates of Cauſes of Action, Forms of Diſtraining for Rents, Superſedeas's for Stay of Execution, *&c.*

As the Binding will take up ſome Time, they will, as faſt as Bound, be ſent to the reſpective Court-Houſes in the Province, where the Subſcribers, or ſuch as chuſe to buy any of them, may call for them.

N. B. Advertiſements will be affixed at the Court-Houſe-Doors, adviſing who have the giving of them out.
